

# Note to families and visitors

## Temporary change to visiting rules

- One visitor per patient until further notice
- Visitors must follow our personal protective equipment (PPE) rules

The hospital is enacting these rules to ensure we provide the safest, quality care environment for patients, visitors, staff, physicians and volunteers during this H1N1 period. Those not following these rules will not be permitted to visit. Staff and physicians can inform you of any PPE requirements.

Thank you for your understanding and compliance of this temporary measure.
